XITING
SAP Security Internship Program

Why Xiting:

Picture yourself working on intriguing projects, such as designing new authorizations for a customer in our internal project. During your internship, you'll delve into the intricacies of SAP security projects, gaining valuable program and project management experience along the way.

Your Tasks:

- Get hands-on experience in designing new authorizations for a customer in an internal project.
- Gain insights into the implementation of SAP security projects, acquiring program and project management skills.
- Contribute to advising our international customers, witnessing the day-to-day life of a consultant.
- Analyze business processes and actively participate in process design and optimization.
- Immerse yourself in our SAP systems and familiarize yourself with Xiting tools.
