About the

# Babeş-Bolyai University

*“The oldest university in Romania,  
 one of the most prestigious in Europe.”*

His Royal Highness, **The Prince of Wales**  
 Doctor Honoris Causa of Babeş-Bolyai University

*“It’s a terrific honor to be a member  
 of the Babeş-Bolyai University. It means  
 a great deal to me!”*

**Eric Maskin**  
 Professor at Harvard University; Nobel laureate in Economics  
 Doctor Honoris Causa of Babeş-Bolyai University

Babeş-Bolyai University (UBB) is currently **the largest** Romanian university, hosting around **48,600 students** enrolled in Bachelor, Master, PhD or other academic programs in the 2021-2022 academic year, within its **22 faculties**.

Situated at the confluence of the Eastern and Western cultures, UBB is a dynamic higher education institution, with deep roots in Central Europe and strong international academic ties. Its origins date back to 1581, making it **the oldest** institution of higher education in Romania.

Considering its position in the most important university worldwide rankings, UBB is **the best** higher education institution in Romania.

<p>Academic Ranking of World Universities (Shanghai Ranking)</p> 	<p>CWTS Leiden Ranking</p> 
<p>Times Higher Education World University Rankings</p> 	<p>US News Best Global Universities</p> 
<p>QS World University Rankings</p> 	<p>CWUR World University Rankings</p> 

UBB is the first (and only) **five-star university** confirmed in Romania by the international QS STAR audit of Quacquarelli Symonds (QS), the company that also publishes the QS ranking of the world’s universities, one of the most prestigious and used rankings of higher education institutions.

UBB is the first (and only) university in Romania to be a member of the international academic organization **GUILD**, which brings together some of the most important European advanced research universities, as well as of **EUTOPIA**, a university alliance made up of prestigious European universities and whose ambitious goal is to redefine the future directions of European higher education.

More information about UBB can be found at <http://www.ubbcluj.ro/ro/despre/>

Universitatea Babeş-Bolyai | Facultatea de Ştiinţe Economice şi Gestiunea Afacerilor

## Curvine

About the

# Faculty of Economics and Business Administration

The Faculty of Economics and Business Administration (FSEGA) has been part of Babeş-Bolyai University (UBB) since 1961, after being established as an independent institution in 1920. Thus, the Romanian economic higher education in Transylvania is **older than 100 years**.

Today, UBB-FSEGA is the largest faculty of UBB and of any Romanian university, having in the 2021-2022 academic year about **9,300 students** enrolled in its Bachelor, Master or PhD programs, as well as more than **200 permanent teaching staff** and almost **150 associates**.

## Best Romanian higher education institution in

Economics Research

Tilburg University's Economics Schools Research Ranking

Economics & Econometrics Business & Management Studies

QS - Quacquarelli Symonds World University Ranking

Business & Economics

THE - Times Higher Education World University Ranking

Considering its position in the most important university worldwide rankings by subject, FSEGA is **the best** Romanian higher education institution in *Economics and Business*.

## Financial information

### Admission costs

Admission costs for the 2022-2023 academic year		
Romanian, European Union, Economic European Area or Swiss Confederation citizens		
Bachelor's and Master's Level	Admission processing fee: <b>50 LEI*</b>	Admission registration fee: <b>150 LEI*</b>
Citizens studying on their own in Romania, from outside the European Union, the European Economic Area and the Swiss Confederation		
Bachelor's and Master's Level	Admission processing fee: <b>50 EUR</b>	

### Tuition fees

Tuition fees for the 2022-2023 academic year	
Romanian, European Union, Economic European Area or Swiss Confederation citizens	
Bachelor's Level	<b>2,900 LEI per year*</b>
Master's Level	<b>3,500 LEI per year*</b>
Citizens studying on their own in Romania, from outside the European Union, the European Economic Area and the Swiss Confederation	
Bachelor's Level	<b>300 EUR per month (9 months/year)</b>
Master's Level	

### Accommodation

UBB-FSEGA offers a limited number of shared rooms in student dorms. If students share a room in a student dorm, they pay between **100 and 220 LEI\* per month**. Students can also rent and share an apartment, or rent a small one. If students share an apartment, they can obtain a single bedroom **from 100 EUR upwards per month**.

### Food

A regular menu at the on-campus cafeteria costs about **15 LEI\***. Students can find all kinds of restaurants and snack bars in town. Regular lunch menus are priced from around **25 LEI\*** upwards. In the fast-food outlets, menus are generally more favorably priced.

### Travelling

In Cluj-Napoca, travelling by public transport (trolleys, buses, and trams) is very convenient, cheap, and is encouraged. A single ticket (for one trip within the city) costs **2,5 LEI\***, while a full subscription for a month costs **70 LEI\*** for one transportation line, or **130 LEI\*** for all lines. Students can also use local taxi services, prices varying from **2 to 3 LEI\* per km** (using a taxi, one could get from any part of the city to UBB-FSEGA for **around 25 LEI\***).

\* "LEI" represents the national currency of Romania; 1 LEI = 0.2 EUR (in March 2022)

## Academic Year Structure

The structure of the 2022-2023 academic year for the 1<sup>st</sup> year of study – Bachelor & Master

1 <sup>ST</sup> SEMESTER (OCTOBER 3, 2022 – FEBRUARY 26, 2023)					
Teaching (12 weeks)	Vacation (2 weeks)	Teaching (2 weeks)	Examinations (3 weeks)	Vacation (1 week)	Reexaminations (1 week)
2 <sup>ST</sup> SEMESTER (FEBRUARY 27, 2023 – JULY 16, 2023)					
Teaching (7 weeks)	Vacation (1 week)	Teaching (7 weeks)	Examinations (3 weeks)	Vacation (1 week)	Reexaminations (1 week)

## Admission procedures

### EU, EEA or Swiss Confederation citizens

If you are a citizen of the European Union, Economic European Area or the Swiss Confederation, you may participate in the admission process in the same conditions as Romanian citizens.

Before participating in the admission process, you must follow a procedure in order for your previous studies to be recognized in Romania.

Information regarding the recognition of studies procedure:

[http://www.cci.ubbcluj.ro/degree\\_students/eu\\_students.php](http://www.cci.ubbcluj.ro/degree_students/eu_students.php)

After you have completed the procedure, you can register for admission at the faculty, where you need to submit the following documents: application form, motivational essay (for Bachelor programs and for some Master programs), certificate of equivalence of previous studies, and proof of payment for the applicable process fee and registration fee.

For Bachelor programs, candidates' selection is made according to two criteria: the motivational essay which will be graded as accepted/rejected, and, respectively, the average of the candidate's grades according to the certificate of equivalence of previous studies.

For Master programs, the admission process is based on three components: an essay, research project, or thematic interview (25%), depending on the study program; the average grade for the Bachelor studies (50%) and, respectively, the average grade for the Bachelor exam (25%).

Information regarding the admission procedure:

[https://admitere.ubbcluj.ro/en/internationalstudents/#eu\\_citizens](https://admitere.ubbcluj.ro/en/internationalstudents/#eu_citizens)

### Citizens from outside EU, EEA and the Swiss Confederation

The admission procedure involves, as a first step, submitting and registering an application at the university. If complete, the application file is processed by the university in 5-10 working days. The files accepted by the university will be sent to the Ministry of National Education for evaluation. For accepted candidates, the ministry will issue an Acceptance Letter, which will be sent in original to the university in 30-40 working days. Afterwards, the university will inform the candidate about the acceptance and will send the Acceptance Letter to the candidate.

If admitted to study in Romania, after receiving the Acceptance Letter, the candidate must contact the closest Romanian authority and search for information concerning the study visa application. The visa application is a personal approach and the university is not in the position to interfere in the process. In case the visa application includes some documents issued by the university, the candidate must require specifically those documents.

For enrollment at the faculty the student must submit the original study documents and the proof of tuition fees payment for the first academic year. Please be aware that after receiving the Acceptance Letter, each candidate has to confirm that he/she accepts to enroll at Babeş-Bolyai University, by sending an email with the receipt attesting the payment of the tuition fee for the first academic year.

Information regarding the admission procedure:

[http://www.cci.ubbcluj.ro/degree\\_students/non\\_eu\\_students.php](http://www.cci.ubbcluj.ro/degree_students/non_eu_students.php)

# International Orientation

FSEGA is the first (and only) faculty in Romania to be a full member of **European Foundation for Management Development (EFMD)**, the largest global network of organizations in the field of management development and business administration.

## International Agreements and Mobilities

FSEGA encourages and enables its students and staff to enrich their international experience, offering various international mobility opportunities. The university has Erasmus or other types of inter-institutional agreements focused on *Economics and Business* with about **130 universities** around the world.

## International Week

FSEGA organizes each year an **International Week**, during which students attend classes held in English by invited international lecturers. At the end of each course, students take an exam to receive a grade and academic transferable credits for the course. More information about this event can be found at: [www.econ.ubbcluj.ro/fsegainterweek](http://www.econ.ubbcluj.ro/fsegainterweek)

International Business  
and Economics

Finance and Banking  
Management

Unternehmensführung

# Accounting and Management Information Systems

Teaching language: English

## Objectives

The program aims to prepare specialists with higher education in accounting and management information systems, both the curriculum and the syllabus being designed to develop students' entrepreneurial spirit, and to ease their integration in the actual business environment after graduation. Internship programs add value to the program by putting to use the theoretical issues learned throughout courses, labs and seminars, all within the context of the economic environment. The program helps students to develop their knowledge, abilities and skills in order to become competent accountants, able to successfully face the challenges of a dynamic business environment.

## Contents and structure

The program has a curriculum that covers topics focusing on accounting and management information systems, structured so as to develop students' abilities to apply accounting regulations for various types of organizations, to measure performance and assess organizations' competitive positions, as well as to contribute to the development of financial-accounting and fiscal strategies and policies within companies. The curriculum also provides students with competencies related to carrying out economic analyses, syntheses, forecasts and evaluations,

handling financial-accounting and management information systems, developing and analyzing financial statements and other financial reports with the purpose of supporting the decision-making process, as well as understanding and undertaking the profession's Code of Ethics and Conduct.

## Career perspectives

The program prepares students to become professional accountants. It covers theoretical and conceptual accounting matters and teaches them the accounting skills necessary to make them employable in a variety of settings. Thus, after graduation, students can aim for positions within private and listed companies, public institutions and non-profit organizations. Potential jobs may include: certified accountant, financial auditor, assessor, fiscal consultant, certified financial analyst, internal auditor, cost-price analyst, management controller, budget consultant, accounting inspector, credit administrator, banking officer, censor, liquidator, financial guard commissar, financial-banking counselor, financial-accounting specialist, counselor in economic management, databases administrator, IT consultant in financial reporting, programmer analyst etc. Moreover, the program provides the starting point for students' accession to professional bodies in the

area such as those representing accountants, auditors and assessors.

## International perspectives

Graduates have the opportunity to obtain the Chartered Institute of Management Accountants (CIMA) certification for professionals in accounting and finance, within the UBB-FSEGA – CIMA program. Obtaining a certification from CIMA offers graduates the opportunity to enjoy a much better job, companies that employ economists holding CIMA certification usually being multinational companies. Moreover, students enrolled in the program can study one semester at prestigious universities outside Romania, within the framework of UBB-FSEGA's various Erasmus inter-institutional agreements, or other inter-institutional agreements allowing students exchange, or international internship programs for students.

## Contact

👁️ **Assoc. prof. Cristina ȘTEFĂNESCU, PhD**  
 ✉️ **cristina.palfi@econ.ubbcluj.ro**

"I have chosen this study program and I don't regret it. The quality of education is high and this way I also get to practice English all the time in class. The job opportunities upon graduation are better than in other fields, either in a company or as a freelancer. Nowadays almost everyone speaks English, but not everyone knows economic terms, which are not taught in high school."

**LARISA ALBU, ROMANIA**

# Comptabilité et Informatique de Gestion

Langue d'enseignement: Français

## Objectives

La filière française a été créée conformément au programme multiculturel de l'Université Babeş-Bolyai et répond aux attentes de la société roumaine, qui fait partie de l'Union Européenne. Cette filière offre aux étudiants la possibilité de se spécialiser dans un domaine applicatif des sciences économiques, la Comptabilité (et informatique) de gestion de sorte que, à la fin des trois années d'études, ils pourront facilement trouver un emploi dans une entreprise d'orientation française, même plus – ils seront convoités par les employeurs de l'espace francophone. Ces objectifs sont soutenus par les partenariats avec d'importantes universités et institutions francophones, aussi que les intervenants externes de la sphère professionnelle et académique.

## Contenu et structure

Le curriculum du programme répond aux exigences des bourses dans l'espace francophone, des programmes de master en sciences de gestion/recherche, et des stages dans les institutions et les entreprises francophones partenaires. Les disciplines fondamentales et de spécialité, les disciplines à choisir et les disciplines facultatives proposées, visent l'achèvement du raisonnement économique en général et professionnel en particulier. A côté la maîtrise des théories et des normes professionnelles, tout com-

me les simulations pratiques en comptabilité et informatique, qui assurent l'expertise technique, les étudiants ont la possibilité d'acquérir des connaissances solides de langue française grâce aux cours de spécialité, mais aussi d'améliorer le niveau d'une autre langue moderne (anglais, allemand, italien, espagnol).

## Compétences et aptitudes

Grâce au contenu des disciplines prévues et aux méthodes d'évaluation de la performance des étudiants, le programme assure l'acquisition de compétences professionnelles et transversales nominalisées par le Cadre Européen des Qualifications (EQF). La relevance du programme s'avère de même par rapport aux occupations nationales, européennes et internationales spécifiques au domaine. En terme de compétences professionnelles (par exemple le traitement des données pour dresser des états financiers ou l'utilisation de ressources informatiques), les stages/ internship et les évènements qui réunissent les étudiants et les professeurs de la filière avec les entreprises et institutions francophones installées dans la région, ont un apport considérable. En termes de compétences transversales, il faut évoquer aussi les activités de l'association des étudiants de la filière française (AELF).

## Perspectives d'emploi

Les professeurs du programme et les ex-étudiants ont créé des associations dans le milieu universitaires et le milieu des affaires. Les contacts, les accords et les présentations pour des offres d'embauche/de stage ou autres forme de collaborations avec les sociétés, soutiennent les étudiants à matérialiser leurs études. Les débouchés sur le marché spécifique visent des métiers comme: cadre opérationnel ou supérieur en comptabilité, contrôle, finances; expert-comptable, commissaire aux comptes, auditeur financier; responsable du service comptable, contrôle de gestion, contrôle interne (dans le cadre d'une entreprise ou dans un cabinet individuel qui exerce une profession libérale).

# International Business and Economics

Teaching language: English

## Objectives

The main objectives of the program are to prepare specialists for the economy of the future, and to develop general and professional competences needed for the international labor market, in both emerging and developed economies, for private and public sectors. The program is designed so as to develop students' entrepreneurial spirit, communication skills and team work abilities, as well as to provide them with the academic and business competences required for any international business endeavor.

## Contents and structure

The program offers students an up-to-date curriculum, similar to those offered by top universities in Europe (such as University of Wien, Freie Universität Berlin, Hull University, University of Maastricht, Nottingham Trent University, Bocconi University and others). Topics like microeconomics, macroeconomics, European economics, comparative economic policies, international trade, international investments, multinational corporations, economics and regional development policies, and economic diplomacy represent

the core of the program. The program focuses on students' acquiring appropriate knowledge, analytical skills, as well practical professional experience, internships being available at important international companies such as Bombardier, Emerson, Endava, Office Depot, Evozon and many others, under the guidance of academic and professional advisers.

## Career perspectives

Considering the specific competences obtained within this program, supported by the best academic team in the region, the career opportunities of future graduates are various and attractive, both at national and international level. Potential jobs that are targeted by this program include: business consultant, economist in international trade, expert in investments, customs official, diplomacy consultant, commercial representative, research assistant in international trade, business analyst, customer care assistant, European business consultant and others.

## International perspectives

Graduates' acquired skills and abilities allow them to pursue successful interna-

tional careers, as well as to continue their studies within a master program, either at UBB-FSEGA, or in other European universities. Moreover, students enrolled in the program can study one semester at prestigious universities outside Romania, within the framework of UBB-FSEGA's various Erasmus inter-institutional agreements, or other inter-institutional agreements allowing students exchange, or international internship programs for students.

# Finance and Banking

Teaching language: English

## Objectives

The main objective of the program is to develop specific skills and competencies for financial professionals, being designed so as to combine theoretical knowledge with practical proficiency in finance, considering the current global development and the challenges to which economies are subjected. The program is focused on developing students' professional competencies in the financial area of expertise such as: applying knowledge, methods, techniques, and instruments in order to perform financial operations and transactions; preparing investment projects, evaluating investment projects, drafting investment budgets; forecasting incomes and expenses at corporative level; identifying and managing risks specific to financial, banking and insurance activities; trading and managing mutual funds, private equity funds, hedge funds and derivative instruments.

## Contents and structure

The structure of the program is designed so as to transform a high-school graduate into a professional during three years of intensive study. In order to guarantee graduates' insertion in the labor market, the program responds to the increasing expectancies of financial, banking and insurance activities, expectancies which are amplified by the need to respect European organizing and functioning principles. The program

has a curriculum that covers topics focusing on acquiring strong knowledge in the field of financial management and planning of corporations, banks and insurance societies, as well as on developing abilities that would allow the graduates to act competently within economic entities, ranging from the management of one's own business to different financial professions in specialized institutions. The financial core curriculum is complemented by optional courses for adjacent economic domains such as accountancy, management, marketing, informatics, statistics and econometrics.

## Career perspectives

Graduates are prepared to activate in financial institutions and companies, being able to work at different levels in corporations, insurance companies, banks, fiscal administrations, brokerage companies. Due to the continuous growth of financial markets the demand for professionals in this area increases day by day. The financial, banking and insurance sector offers countless hiring opportunities and the skills acquired within this study program qualify its graduates and potential specialists in the field. Potential jobs may include: economist, financial manager, financial analyst, assistant analyst, banking expert, financial researcher, broker, financial accountant, actuary, fiscal and banking counselor, insurance inspector, investment analyst, risk control special-

ist, risk administrator, insurance system specialist, research assistant in finance and banking, product manager etc.

## International perspectives

Students acquire knowledge and competences that allow them to pursue successful international careers in finance, insurance or banking, the program's curricula being adapted to the exigency of prestigious universities abroad, responding to international standards, and providing a high quality learning experience. Moreover, students enrolled in the program can study one semester at prestigious universities outside Romania, within the framework of UBB-FSEGA's various Erasmus inter-institutional agreements, or other inter-institutional agreements allowing students exchange, or international internship programs for students.

# Management

Teaching language: English

## Objectives

The program offers students various opportunities for developing skills in different areas of activities relevant to the contemporary business environment. It provides both a theoretical and a practical approach to the main business concepts for successful and effective management, familiarizing students with state-of-the-art concepts, methods and techniques from the management field. Students have the chance to develop essential abilities and competencies in managing the challenges faced by companies in the 21st century. Students can develop both general and specific competencies which give them the opportunity to perform in both managerial and non-managerial positions. The Management program is developed according to the main European and North American standards; consequently a graduate may easily continue studies in any national or international university.

## Contents and structure

Considering its structure, the role of the program is threefold. Firstly, it includes a general approach of the economic environment through basic courses, secondly it brings an introductory perspective to management, and thirdly it details some very specific management subjects presenting various and important aspects of operations within companies.

The first three semesters offer a broad and general perspective over the business principles and provide orientation for the last three, dedicated mainly to management topics. The last three semesters include various management courses, all related to different relevant business activities. They offer a more specific approach to management and develop competencies to plan, organize, lead, and control management activities in various economic sectors.

## Career perspectives

The program includes a mandatory internship program which helps students develop a practical view over the business environment, the internship being flexible, while foreign companies based abroad can also be chosen for the internship, if required. The graduates are trained to perform in various jobs, in both managerial and non-managerial positions, in manufacturing or service companies or in public institutions. The program provides students with competencies and abilities needed to succeed on the labor market, possible jobs including: economist, management consultant, project manager, human resource manager, operations manager, quality manager, economic researcher in management, bank manager, logistics planner, customer service representative etc.

## International perspectives

International perspectives are enhanced by the similarities with other curricula in universities around the world in the field of management. Thus, graduates have different opportunities to continue the studies, in management or in other business area. The program gives students opportunities to interact with people from different cultures and to develop better understanding of the global business environment. Also, there is a large number of Erasmus and other exchange programs available, creating opportunities for studying abroad. The length is usually one semester, but there are different choices based on various agreements between UBB-FSEGA and partner universities (including the possibility to obtain a joint degree). Moreover, professors from abroad are frequently invited to give lectures for the program's students.

# Unternehmensführung

Unterrichtssprache: Deutsch

## Ziele

Die Ziele der Spezialisierung orientieren sich in der Richtung der Ausbildung der Fachspezialisten im betriebswirtschaftlichen Bereich, die international anerkannte Kompetenzen besitzen. Wir möchten unseren Studenten eine wirtschaftswissenschaftliche Ausbildung im Management und Unternehmensführung ermöglichen, die eine fundierte und praxisnahe Lehre erfordert. Dieses Ziel versuchen wir u.a. durch grundlegende und fundierte Kenntnisse der Unternehmensführung und der Informationstechnologie zu erreichen.

## Inhalt und Struktur

Neben der Grundausbildung bietet das Studienprogramm die neuesten Aspekte des Wissens im Bereich Management und Controlling im Unternehmen an. Der Lehrplan ist inovativ konzipiert in dem die Studenten eine echte professionelle Beurteilung bezüglich der Anwendung der Kenntnisse in verschiedenen spezifischen Situationen erwerben. Die Vorlesungen und Seminare werden sowohl von einheimischen als auch von Gastprofessoren unterstützt. Die Kooperation mit Universitäten aus dem deutschsprachigen Raum, wie zum Beispiel, Universität Wien, Universität Trier, Universität Siegen, Universität Bern, Hochschule für Wirtschaft und

Umwelt Nürtingen – Geislingen, Fachhochschule Schmalkalden, etc. wird nachhaltig entwickelt. Die im Lehrplan enthaltenen Lehrveranstaltungen tragen dazu bei das Wissensspektrum der Absolventen zu erhöhen, vertiefen und erweitern.

## Kompetenzen und Fähigkeiten

Die Absolventen des Studienprogramms werden in der Lage sein die Datenerhebung, -verarbeitung und -analyse im Umfeld des Unternehmens zu erkennen. Sie erwerben nützliche Fähigkeiten in der Implementierung von methodologischen Vorschriften, wirtschaftlichen Massnahmen, Politiken und Programme; Durchführung von buchhalterischen Arbeiten, Erstellung von wirtschaftlichen und finanziellen Berichte und Jahresabschlüsse; Verwendung von wirtschaftlichen Datenbanken und Softwareprodukte; Erstellung und Management von Businesspläne und bereichsspezifischen Tätigkeiten, etc. Darüber hinaus können sie Weiterbildungsmöglichkeiten und die effiziente Verwertung von Ressourcen und Ausbildungstechniken für die eigene Karriereentwicklung identifizieren. Transversale Kompetenzen erwerben sie durch die Identifizierung von Rollen und Verantwortungen in einer interdisziplinären Gruppe.

## Karriereperspektiven

Die Absolventen dieser Spezialisierung werden bereit sein, ökonomisches Wissen zu besitzen, inklusive Führungsfunktionen im Unternehmen auszuüben. Wichtig ist, dass die Studenten einen Überblick über den Ablauf im Alltag eines Unternehmens erhalten. Für die Studenten der Deutschen Unterrichtslinie besteht häufig die Möglichkeit, bei deutschen Unternehmen in Siebenbürgen zu arbeiten. Unsere Fakultät arbeitet mit dem Deutschsprachigen Wirtschaftsclub Nordtransilvanien (DWNT) und mit zahlreichen Unternehmen aus dem Deutschsprachigen Raum zusammen (Beispiel möglicher Berufe: Expert Unternehmensbewertung, Buchhalter, Qualitätsbeauftragter).

# INTERNATIONAL MASTER PROGRAMS

Accounting and Organizations

International Business Management

Internationales Management

Entrepreneurship  
and Business Administration

Business Modeling  
and Distributed  
Computing

# Accounting and Organizations

Teaching language: English

## Objectives

The program's main mission is to stimulate students' passion for research while offering intensive training meant to facilitate their pursuit of a career in academia or business. We aim to extend knowledge from the national towards the regional and international perspective, considering the similitude with US study programs. The program offers two years of coursework and research training in business and economics taught by top local scholars and invited internationally renowned academics. International collaborations bring strength to the program, making it possible for students to benefit of the best available training and supporting them in making informed future career decisions.

## Contents and structure

The program's curriculum includes core courses as well as elective courses enabling students to tailor their training in accordance to their career objectives. Therefore students can choose between different tracks that allow them to get the best training for a career in academia or business. The *academia oriented tracks* prepare students for their PhD dissertation research, being integrated with three years PhD Programs which are common in Europe as part of five years Graduate Programs. Planned activities are meant to expose students to research methodology courses which will develop their research skills, as well as courses offering them deep knowledge in the field of accounting,

finance and statistics. The *business-oriented track* prepares students to undertake top positions in multinational corporations, auditing firms, consulting firms and financial institutions. Planned activities are meant to enable students to better understand the business environment while also getting in touch with business research and most frequently used empirical and analytical tools.

## Career perspectives

The program allows students to prepare for a career in academia or business. The *academia oriented tracks* are designed to provide students with the best available guidance for their research activities. Through the existent international collaborations, the program on one hand welcomes internationally renowned visiting professors, while on the other is able to place students in well-known PhD Programs in Europe and the US. The *business-oriented track* is designed to develop an advanced level of knowledge in the area of financial reporting, financial analysis and fiscal systems which will facilitate students' access to the status of certified accountant in accordance to CIMA (Chartered Institute of Management Accounting) and ACCA (The Association of Chartered Certified Accountants). Being a CIMA certified Master Program, after graduation students can obtain the CIMA Advanced Diploma in Management Accounting certification.

## International perspectives

Developing the program's curriculum was done with advice from professors associated with the Kenan-Flagler Business School, University of North Carolina at Chapel Hill, London Business School, and ESSEC Business School Paris. Thus, students can benefit of teaching activities and research guidance from internationally renowned academics from top European and American universities. As the program is organized in partnership with an American University, students can therefore benefit of a one semester mobility at the Kenan-Flagler Business School, University of North Carolina at Chapel Hill, as well as of other Erasmus+ student mobility.

# International Business Management

Teaching language: English

## Objectives

The program addresses the current needs of the economic higher education system through a teaching process oriented towards labor market that this highly influenced by changes and new requirements regarding the skills that graduates require. It offers the organizational framework to develop competencies for the identification and exploitation of international business opportunities. The program provides students with the know-how and skills to succeed in today's competitive and globalized business environment. This is achieved by using a balanced mix of theoretical, practical and project-based active learning elements.

## Contents and structure

In the first year of the program, students develop their core knowledge and skills. The courses offered focus on international aspects of marketing, finance, business law as well as aspects related to leadership practices or European policies. During the second year, students are able to customize their studies through increased flexibility and a choice of various elective courses. Students will have to participate in an internship in order to put their learning experience into practice and they will conclu-

de their studies with a research-oriented master thesis.

## Career perspectives

During the program, students are trained to apply their solid theoretical, methodological and empirical background in specialized areas of international management. The program's close relationship with business partners guarantees students an early contact with potential employers, while senior directors are often invited to lead discussions on the latest business practices and issues. As a result of the program's international outlook, graduates attract the attention of potential international employers. They could work as: counselors/experts/economists in management, counselors/experts/economists in international economic relations, consultants in management, researchers in management, experts in the field of investments, etc. Graduates will have numerous opportunities in a variety of organizations, such as multinational corporations, consulting firms, small and medium-sized enterprises and research centers. Also, after successful completion, it allows students to pursue an academic career in the context of doctoral studies in Management

## International perspectives

Apart from the internationally-oriented curriculum, students will get the chance to experience foreign cultures and perspectives through exchange programs with more than 100 partner universities worldwide. Significant international opportunities are also offered by working groups formed of international students, lectures given by international visiting professors, as well as by international study tours.

# Internationales Management

Unterrichtssprache: Deutsch

## Ziele

Die Hauptziele, die dieses Masterprogramm erreichen will, können wie folgt zusammengefasst werden: Aneignung und Vertiefung der Konzepte, der Theorien und Methodik, die spezifisch für den Fachbereich Internationales Management sind. Zugleich strebt das Masterprogramm die Wissensvertiefung der Studierenden durch DAAD-, ERASMUS – und ROTARY-Stipendien an, jedoch auch die berufliche Vorbereitung dieser in Bezug auf die Entwicklung der notwendigen praktischen Fähigkeiten, in deutschsprachigen Unternehmen.

## Inhalt und Struktur

Das Masterprogramm bietet den Kursteilnehmern außerordentliche berufliche Perspektiven für ihre zukünftige Karriere, indem er auf die zunehmende Nachfrage nach jungen Absolventen mit Managementfähigkeiten im Bereich internationaler Unternehmen reagiert. Das Curriculum ist über 4 Semester strukturiert und bietet hochinteressante Pflicht und Wahlfächer. Einige davon sind Internationales Organisationsmanagement, Vertiefte Betriebsbuchführung, Methoden und Techniken des Qualitätsmanagement, Marketingstrategien, Business Process Ma-

nagement, Wirtschaftspolitiken der EU, etc. Auf Master Ebene ein sehr wichtiges und 100% praxisorientiertes Fach ist das Praktikum in einer Multinationalen Unternehmung. Das Masterprogramm bietet auch jährliche Workshops in deutscher Sprache an.

## Kompetenz und Fähigkeiten

Die wesentlichen fachlichen Kompetenzen beziehen sich auf die Evaluierung, Erlernen und Verwertung der Forschungsergebnisse in den wirtschaftlichen Tätigkeiten der internationalen Organisationen; die Identifikation und Durchführung von Tätigkeiten unter der Anwendung von innovativen Managementmethoden und -techniken; Entscheidungsdurchführung im Unternehmen unter Berücksichtigung der Unternehmenswerte, der Finanzstrategien und Personalmanagement, etc.

## Karrierespекtiven

Das akademische Angebot dieses Masterprogramms wird in Partnerschaft mit der Universität Wien, Universität Trier der Tu-Chemnitz, der Hochschule für Angewandte Wissenschaften Nürtingen-Geislingen und der Universität Bern ermöglicht. Zugleich haben die Studierenden die Möglichkeit ein ERASMUS – Internship über drei Monate (01.07 – 30.09) bei

MHP – a Porsche Company zu erwerben. Mögliche Berufe die unsere Absolventen ausüben sind: Manager von Qualitätsmanagement-Systemen, Verkaufsmanager, Projektmanager, Experte im Management von Investitionstätigkeiten, Berater im Management, Berater/ Experte/ Prüfer/ Gutachter/ Wirtschaftswissenschaftler im Management und Marketing.

# Entrepreneurship and Business Administration

Teaching language: English

## Objectives

The program provides the premises for the development of a unique managerial culture through an educational system that offers students the necessary skills for successfully conducting nowadays businesses. With classes taught entirely in English, Entrepreneurship and Business Administration develops a holistic approach of organizational management which revolves around a highly ranked curriculum incorporating theoretical and methodological aspects of business administration as well as practical aspects that define entrepreneurial behavior. After completion of this program, the graduates will have the necessary skills to identify business opportunities and develop business strategies for both start-ups and existing companies, to perform feasibility analysis of new business ideas and develop business plans, to apply concepts and principles of human resource management and knowledge management, to develop marketing strategies to sustain businesses, as well as to implement efficient operations within companies, and to apply strategic and ethical behavior.

## Contents and structure

Students will follow core studies that are made up of both compulsories and elec-

tives. The first year introduces students to the essentials of management, marketing, finance and accounting theories allowing students to gain fundamental knowledge from the challenging courses included in the curriculum. Starting with the second year, students can shape their individual curriculum according to their preferences as they might focus on core electives of their choice. During the last semester students will have to write their Master's thesis and do an internship.

## Career perspectives

The program equips students with the necessary skills to run their own businesses, allowing them to apply for upper management positions, and providing them with practical experience during the Internship program while they are still studying, as well as with a thorough preparation in order to pursue a PhD in Management. Graduates have several options for their career path, such as: entrepreneurs, general managers, project managers, marketing managers, production managers, consultants in management, etc. Graduates are typically employed by multinational corporations, foreign subsidiaries, international consulting agencies, start-ups or non-profit

organizations. Moreover, many graduates of this master program choose to open their own businesses.

## International perspectives

Apart from the internationally-oriented curriculum, students will get the chance to experience foreign cultures and perspectives through exchange programs with more than 100 partner universities worldwide. Significant international opportunities are also offered by working groups formed of international students, lectures given by international visiting professors, as well as by international study tours.

# Business Modeling and Distributed Computing

Teaching language: English

## Objectives

This master program takes into account the multi-layered nature of the labor market and the different requirements raised by different types of companies working with Business Information Systems – from IT and BP outsourcing, consultancy, start-ups and product developers to private-public partnerships or research projects. Consequently, the master program develops three categories of competences: (a) business analysis and process improvement skills based on Business Process Modeling tools, Enterprise Architecture frameworks and Process Automation platforms; (b) implementations skills for distributed and smart information systems, leveraging Artificial Intelligence tools and Big Data analytics; (c) scientific research competences for those who want to occupy positions in research projects or to pursue a doctoral degree.

## Contents and structure

The curriculum consists of three topical tracks and one research-oriented meta-track. The Business Modeling Track includes topics regarding Business Process Improvement, Enterprise Architecture and Knowledge Management with the help of various modeling tools, languages and automation platforms. The Distributed Computing Track develops skills for working in Cloud, Internet of Things and High Performance Computing environments (students have access to the highest performance computing cluster in a Romanian University). The Artificial Intelligence Track investigates state-of-the-art methods for Machine learning, Big Data analytics, Web mining and Social Networks

analysis. The Research Meta-Track covers best practices for organizing and communicating research, towards writing a dissertation that provides publishable results.

## Career perspectives

The business analysis and process improvement skills will enable students to work for Business Process Outsourcing providers, in advisory departments for companies that provide consulting on enterprise architecture or business process improvement or in Model-driven Systems development. The implementation skills will enable students to take on positions that employ Artificial Intelligence tools or must manage distributed architectures (Cloud, Data Fabrics, Internet of Things etc.). The scientific research competences will empower students for the type of work that is expected in research projects or PhD programs.

## International perspectives

Each year, selected students have received support for participating in the NEMO (Next-generation Enterprise Modeling) Summer School in Vienna, as well as in relevant international conferences – PoEM, ENASE, ICEIS, CAISE, IE, GECON. Some students have published papers derived from their dissertation theses, showing that they are prepared to follow a PhD program in the field of Information Systems. Professors from international universities (University of Vienna, WU Vienna, Cardiff University, Heriot-Watt University Edinburgh) are occasionally invited to provide lectures in this master program, including curricular contents and didactic tools to enrich our curricular offer. The Romanian

professors also come with their own international experience in research projects and teaching at foreign universities (TU Eindhoven, University of Vienna, Cardiff University, Vrije University Amsterdam, Rotterdam School of Management, STFK UK, Coimbra University). Overall the students develop familiarity with state-of-the-art technologies and become used with English-language contents, presentation styles and research methods conforming international best practices, which supports them in further following studies abroad or in occupying positions where they have to interact with stakeholders in an outsourcing or research context.

“The Business Modeling and Distributed Computing master program is a great opportunity for students who want to expand their knowledge regarding state-of-the-art technologies and methodologies for Business Informatics. The master’s curriculum ranges from Parallel Programming, Artificial Intelligence to the latest concepts and practices in Enterprise Modeling.”

**DAN-CLAUDIU NEAGU**

# CURRICULUM

1 <sup>st</sup> Semester (30 credits)	2 <sup>nd</sup> Semester (30 credits)	3 <sup>rd</sup> Semester (30 credits)	4 <sup>th</sup> Semester (30 credits)
Distributed Systems	Methods in Data Science	Cloud and High Performance Computing	Advanced Research Project in Informatics
Business Process Modeling	Intelligent Agents and Algorithmic Game Theory	Internet of Things	Scientific Research for the Elaboration of Dissertation
Research Methodologies and Academic Writing	Big Data and Web Computing	<b>Elective Course 1</b>	The Preparation Stage of the Elaboration of Dissertation
Parallel Programming	Semantic Business Process Management	<ul style="list-style-type: none"> <li>• Design and Implementation of Enterprise Modeling Tools</li> <li>• Advanced Searching and Optimization Techniques</li> </ul>	Internship in Business Modeling
		<b>Elective Course 2</b>	
		<ul style="list-style-type: none"> <li>• Social Media Analysis</li> <li>• Advanced Parallel Algorithms</li> </ul>	

# About Romania

Romania is a sovereign state located at the **crossroads of Central, Eastern, and Southeastern Europe**. It is a semi-presidential republic where executive functions are held by both government and the president.

Romania is now **one of the fastest growing economies** in the European. The largest local companies include Automobile Dacia, Ford Romania, Electrica, Romgaz, RCS & RDS and Banca Transilvania. Romania's main exports are cars, software, clothing and textiles, industrial machinery, electrical and electronic equipment, metallurgic products, raw materials, military equipment, pharmaceuticals, fine chemicals, and agricultural products (fruits, vegetables, and flowers). Trade is mostly centered on the member states of the European Union, with Germany and Italy being the country's largest trading partners.

Some quick facts about Romania:

- Member of Nord Atlantic Treaty Organization (NATO) since 2004
- Member of the European Union (EU) since 2007
- Founding member of the World Trade Organization (WTO)
- Population of almost 20 million inhabitants
- Surface area of more than 238 square kilometers
- Highest economic growth in EU between 2016-2018
- Low unemployment rate: below 5%

Romania is famous for its **beautiful landscapes** and hence, tourism is a significant contributor to the Romanian economy. Romania was included in the Rough Guides' **top 10 countries to visit** in 2016. Among the popular attractions, one could find the Black Sea resorts, the skiing resorts, the castles from Transylvania, painted churches from Moldavia, the wooden churches of Maramureş or the Danube Delta. Transylvania was designated as the **number one region in the world to visit** in 2016 by Lonely Planet.

# About Cluj-Napoca

Cluj-Napoca is the **second largest city in Romania** (after Bucharest – the capital city), with a population of more than 320 thousands, plus tens of thousands of students from other places coming to the city to study each year.

Cluj-Napoca is equally an **economic and cultural center** of Romania.

The city represents the place where the largest banking group in Romania (Banca Transilvania - BT Grup) was founded and where the group is currently headquartered, Cluj-Napoca being an **important financial and banking center** in which all the main actors of the Romanian financial-banking sector are active.

At the same time, Cluj-Napoca **hosts the regional or national headquarters of many multinational companies**: E.ON, MOL, Emerson, De'Longhi, Bosch, Office Depot, Genpact, FrislandCampina, New Yorker etc.

Also, **a large part of the Romanian IT sector** is located in Cluj-Napoca, big companies in the industry being headquartered or having branches in the city: NTT Data, Endava, Softvision, Fortech, Iquest Technologies, Arobs, Accenture etc. Thus, Cluj-Napoca is quickly becoming Romania's tech-nopolis. The city itself was actually awarded a special prize for *excellence in digitalization* by the Romanian Municipalities Association in 2017.

The remarkable urban architecture, the numerous cultural and religious attractions (museums, churches, theaters, cinemas, monuments and historical buildings, etc.), the variety of restaurants, bars and shopping centers, as well as the **great diversity of cultural events** taking place annually in the city or in its proximity (e.g. *Transylvania International Film Festival*, *Untold Festival*, *Electric Castle Festival*, *Jazz in the Park Festival* and many more) make Cluj-Napoca one of the most attractive cities for young people, the city being designated **European Youth Capital** in 2015 and **European City of Sports** in 2018.

A recent study among 41,000 people in 79 European cities by the Office for National UK Statistics has designated Cluj-Napoca as **the friendliest European city**.

Cluj-Napoca is **one of the most important academic centers** in Central, Eastern, and Southeastern Europe, with about **100,000 students** living in the city. **Six public universities** are active in Cluj-Napoca, among which Babeş-Bolyai University being the largest.
