Abstract: Upon acknowledging the environmental problems, a concept of
durable development has emerged. Initially formulated and presented during the
environmental Conference in 1972 in Stockholm, durable development so becomes
recognized at a global level. Durable development brings together environmental
objectives as well as socio-economical objectives. Furthermore, it represents
a fundamental objective of the European Union. With Romania aderation to
the European Union, our country has to align itself to all the standards of the
community it joined, so, the concept of durable development has been more
and more frequently met and taken into account during economical, social and
environmental activities taken place all around the country.

Key words: durable development; fruit growing
